

## Why Aerosight?

100% analyzed flights  
in time saving and  
efficient way

## Aerosight FDM supports various aircraft types

All FDM related information in one highly secured place

No need for additional  
IT infrastructure and  
system maintenance

Fast and secured access  
from anywhere

Qualified aviation professionals on your side

## Aerosight FDM features

[illegible][illegible]

## Event detection

In a couple of minutes flight readouts with detailed reports, interactive traces and leg replay will be ready for review.

## Automatic data processing

Just upload raw data file and the system will automatically detect all legs in it, extract all parameter values and perform accurate event detection.

## Accurate statistics and safety trends

Featuring dashboards with KPIs and interactive charts for fast overview of the operational safety and trends as well as an easy way to drill down and look deeper into the flight data behind.

## Data Visualization

Data visualization capabilities help to identify patterns and trends in flight data, enabling more effective decision making.

## Embedded Reports

Periodical safety reports and advanced search in detected events to save your time for identifying hazards, monitoring equipment status and discovering potential safety trends.

Additionally, **Aerosight FDM** services can be customized to meet the specific needs of an airline, making it a useful tool for all safety professionals.
